API Integrations

Key Features and Benefits

- Actsoft can exchange data with many third-party solutions, allowing your business to easily implement it into your existing processes and reduce manual data entry.

- Minimize change management for your workforce and consolidate your data by integrating it with different systems you may already be using.

- Save time and money by accessing and syncing the information your business needs from Actsoft, whenever necessary (with eight different programming languages supported).

Automate costly, outdated processes by integrating Actsoft data with key apps like these:

ADP
Import clock-in/out data and reports into ADP.

Kronos
Exchange timecard data and logs of hours worked.

QuickBooks Online
Transfer employee payroll and timesheet data.

Google Calendar
Sync new appointments and work orders.

Dropbox
Add field data from submitted digital forms.

Esri
Integrate GPS positions of employees, vehicles, and assets.

SAP
Streamline new customer creation by syncing client data.

Actsoft Marketplace
Peruse many other solutions our platform can integrate with.
