

GPS Tracking

Seamless integration that helps you drive more revenue.

Maintain constant awareness of employee locations in near real-time with GPS Tracking on Actsoft. Increase overall workforce accountability and efficiency by seeing worker statuses and positions on its live view map. Distribute orders accordingly to employees who are closest to new jobs in the field.

Key Features

- GPS Tracking can be used in tandem with Job Dispatching, allowing you to see the closest available workers to new customer locations.
- Monitor the locations of remote employees and verify that they're where they need to be during business hours.
- Use Geofences to track the entries and exits of work site perimeters by your mobile staff.
- See Actsoft's live view map on the go, from the convenience of a handset's display, using Manager App.
- Adjust your team's mobile device ping rates to increase the frequency of updates in mission-critical situations.

Key Benefits

- Establish accountability and transparency between managers and workers to boost productivity.
- Improve workforce safety by knowing the near real-time positions of your mobile employees while they work.
- Monitor employee activity patterns and workloads more efficiently.
- Streamline operations by rerouting team members to new job sites based on their proximity to them.
- Save time and money with a more effective solution for mobile workforce management.
